SUMMARY

Information Systems undergraduate specializing in Data Science at President University (GPA 3.77/4.00), with experience in analytics, data engineering, machine learning, and application development. At Insta360 Indonesia (PT Denka Pratama Indonesia), built an internal order system to replace fragmented email and Excel handoffs, centralizing 479 active SKUs and tracking 22 recorded sales orders. Developed data pipelines, dashboards, and predictive models, including a national Top 10 result at DSCO BINUS (AUC 0.9933).

EDUCATION

President University - *Cikarang, Indonesia* Expected 2027
B.Sc. Information Systems, Data Science Concentration · GPA 3.77 / 4.00 · Jababeka Scholarship Awardee

TECHNICAL SKILLS

Programming & Analytics: Python, SQL, T-SQL, TypeScript, JavaScript, pandas, NumPy, Microsoft Excel
Business Intelligence & Data: Power BI, Streamlit, data visualization, EDA, forecasting, KPI reporting, data cleaning
Data Engineering & Databases: SQL Server, PostgreSQL, Supabase, Pentaho ETL, star schema, Dagster, data validation
Machine Learning & Development: scikit-learn, CatBoost, XGBoost, LightGBM, NLP, Flutter, React, ASP.NET Core, GitHub Actions, Docker

WORK EXPERIENCE

Data Analyst & Brand Management Intern - *Insta360 Indonesia (PT Denka Pratama Indonesia)* - GitHub Aug 2026 - Present

- Built an **Internal Order System (IOS)** replacing fragmented email and Excel handoffs with a centralized workflow for product catalog, stock verification, orders, and invoices across **479 active SKUs**.
- Developed a Brand Manager Console consolidating **22 recorded sales orders totaling Rp89.11 billion** and **one pending invoice worth Rp5.37 billion**, improving visibility into records and follow-up status.
- Supported marketing reporting across social media, KOLs, ads, and events, giving brand management a foundation for detailed channel-level performance review.

Mentor of Data Science - *President University Developer Club (PUDC)* May 2026 - Aug 2026

- Mentored **approximately 15 junior students** through the full data science pipeline, from data preparation and exploratory analysis to feature engineering, machine learning, and evaluation.
- Led hands-on Python exercises and reviewed assignments, helping mentees practice end-to-end analysis instead of isolated tools.

PROJECT BASED INTERNSHIP

Mobile Developer Project Based Internship - *Bank Mandiri x Rakamin Academy* - GitHub Feb 2026 - Mar 2026
MandiriNews Mobile News Application

- Built a Flutter news application with Riverpod state management and a Supabase backend, integrating NewsAPI, GDELT, and RSS into searchable and categorized article feeds.
- Implemented authentication, bookmarks, reading history, AI summaries, sentiment labels, semantic search, and article-grounded Q&A as technical project deliverables.

Tech: *Flutter, Riverpod, Supabase, Python, NLP*

Data Engineer Project Based Internship - *ID/X Partners x Rakamin Academy* - GitHub Jan 2026 - Feb 2026
Data Warehouse & ETL Pipeline

- Designed a banking star-schema warehouse and automated ETL pipelines integrating SQL Server, CSV, and Excel data into reporting-ready fact and dimension tables.
- Achieved **100% successful FactTransaction loads in project testing** and developed stored procedures for transaction summaries and account balance tracking.

Tech: *SQL Server, Pentaho Data Integration, T-SQL, dimensional modeling*

Data Governance Project Based Internship - *Rakamin Academy* - GitHub Nov 2025
Data Governance Framework

- Analyzed ownership and data-quality gaps, redesigned the RACI framework, and clarified responsibilities across operations and analytics teams.
- Proposed source-level checks, SOP updates, and four-hour quality-audit feedback loops, targeting **98% record accuracy** (proposed target, not an achieved result).

Tech: *Data governance, RACI, SOP design, data-quality auditing*

Data Science Project Based Internship - *Home Credit Indonesia x Rakamin Academy* - GitHub Oct 2025

Credit-Risk Scoring Model

- Integrated eight lending datasets covering **307,511 applications**, engineering 202 numeric features and 50+ behavioral risk indicators for credit-scoring experiments.
- Benchmarked four models; CatBoost achieved **AUC 0.772**, and the reproducible pipeline generated default-probability scores for **48,744 applicants**.

Tech: *Python, CatBoost, LightGBM, pandas, scikit-learn*

Data Science Project Based Internship - *ID/X Partners x Rakamin Academy* - GitHub Sep 2025

Credit Risk Prediction Model

- Prepared and explored approximately **466,285 lending records** across 75 fields, identifying patterns and severe class imbalance in loan-default risk.
- Applied SMOTE and compared Random Forest against Logistic Regression to evaluate minority-class risk detection.

Tech: *Python, Random Forest, Logistic Regression, SMOTE*

SELECTED PROJECTS

Revenue Intelligence Dashboard - *DVD Rental Operations* - GitHub (Project) 2026

- Built Power BI and Streamlit reports covering **14,596 transactions and $61,312 in revenue**, surfacing sales, customer, and inventory patterns.
- Integrated a local Ollama chatbot for natural-language questions and user-requested visualizations beyond static dashboards.

Tech: *Power BI, Streamlit, PostgreSQL, SQL, Ollama*

Adaptive AI Predictive Maintenance Platform - *PT Astra Otoparts, WINTEQ AI Bootcamp* - GitHub (Project) 2026

- Extracted **301,680 engineered feature values** from 480 MATLAB files and 3,352 sensor signal windows for industrial bearing-condition analysis.
- Designed event-driven model and feature updates for new sensor readings in a predictive maintenance prototype.

Tech: *Python, PostgreSQL, ASP.NET Core, signal processing*

Weather Data & MLOps Pipeline - *Independent Project* - GitHub (Project) 2026

- Built a Dagster-orchestrated pipeline using 6.5 years of Jakarta weather data, with partitioned ingestion and model-quality validation.
- Automated daily ingestion and monthly retraining, supported by **36 tests** for data quality and pipeline correctness.

Tech: *Python, Dagster, PostgreSQL, Docker Compose, scikit-learn*

Indonesian Stock Forecasting Dashboard - *Independent Project* - GitHub (Live Deployment) 2026

- Deployed a forecasting dashboard for **100 Indonesian Stock Exchange (IDX) stocks** with price forecasts, news sentiment, and four Top-10 rankings.
- Automated daily data refresh and model retraining with GitHub Actions to keep information current.

Tech: *Python, Streamlit, Hugging Face Spaces, GitHub Actions, NLP*

Claim Trend Forecasting - *MCF ITB x AXA Financial Indonesia* - GitHub (Competition) 2026

- Forecasted 231 to 232 monthly claims and Rp10.99 billion in claim value in a reserve-planning case study.
- Benchmarked five approaches and selected Ridge Regression with EMA after time-series evaluation.

Tech: *Python, time series forecasting, Ridge Regression, EMA*

Phishing URL Detection - *DSCO, BINUS University* (Competition) 2025

- Reached the **national Top 10** with **96.89% accuracy and ensemble AUC 0.9933** on the DSCO public leaderboard.
- Combined TF-IDF and URL-based features with LightGBM and CatBoost models for phishing detection.

Tech: *Python, LightGBM, CatBoost, TF-IDF, scikit-learn*

ORGANIZATIONAL EXPERIENCE

PIC Event Organizer - Golden Code Hackathon 2025 - *PUMA Information Systems x UNITAR Malaysia* 2025

- Led event planning and execution through completion for **25+ participants** from President University and UNITAR Malaysia.

Event Organizer (Multimedia) - TechSprint 2026 - *PUMA Information Systems* 2026

- Managed live sound, multimedia, and presentation operations for TechSprint, supporting sessions for **40+ participants**.

VOLUNTEERING

Project Manager - Aquanomic Digital Education - *President University x Universitas Brawijaya* - GitHub May 2025 - Jul 2025

- Led a Scrum team creating a **WordPress education website prototype** for fishermen and fish-product artisans in Muara Gembong.
- Conducted a digital-marketing workshop for **50+ fishermen and fish-product artisans**, demonstrating the website prototype.

CERTIFICATIONS, AWARDS & LANGUAGES

Certifications: Data Engineer - ID/X Partners x Rakamin Academy (2026); Mobile Developer - Bank Mandiri x Rakamin Academy (2026); Data Governance - Rakamin Academy (2025); Data Scientist - Home Credit and ID/X Partners x Rakamin Academy (2025); Data Analyst Bootcamp - HariSenin (2026)
Awards: Jababeka Scholarship Awardee (2024); DSCO BINUS National Leaderboard Top 10 (2025)
Languages: Indonesian (Native), English
