

DVD RENTAL

FROM RAW DATA TO STRATEGIC DECISIONS: REVENUE INTELLIGENCE DASHBOARD

**An Interactive Business Analytics Tool
Built with Python and PostgreSQL**

Presented By: **Yose Elvis, Natharina Miralda and Regan Albion**

THE CHALLENGE AND THE SOLUTION

The Challenge	The Solution
Traditional DVD rental operations generate massive amounts of transactional data but often lack real-time visibility into store performance, customer retention, and inventory efficiency.	A centralized, interactive analytics dashboard designed to transform raw database records into automated, actionable business recommendations.

DEEP-DIVE ANALYTICS

Profitability Analysis

Business Overview Dashboard tracks rental performance, highlighting \$61,312 in total revenue and 14,596 successful transactions. The data reveals a significant revenue peak in April 2007 followed by a sharp drop in May, while a three-month linear forecast predicts a moderate recovery in June before a gradual decline through August.

DEEP-DIVE ANALYTICS

Store Performance Tracking

Real-time, month-over-month comparisons between retail locations to identify operational gaps.

DEEP-DIVE ANALYTICS

Customer Segmentation

The May 2007 Sales Report highlights the month's top earners, featuring Lust Lock as the leading film with nearly \$17 in revenue. Complementing this, the customer analysis identifies Mildred Bailey as the top spender at \$10, providing a concise snapshot of both product performance and individual consumer contributions.

DEEP-DIVE ANALYTICS

Utilization and Dead Stock

The Inventory Utilization and Dead Stock dashboard monitors stock health for 4,581 total items. While 183 units are currently rented, the data identifies 643 items as dead or never rented, with the Action category showing the highest dead stock ratio at 19.9%. A distribution chart further reveals that 82% of the inventory has remained idle for over a month, highlighting a significant need for liquidation or promotional action.

AUTOMATED INSIGHTS & PREDICTIVE CAPABILITIE
