

Data Science student with experience in predictive modeling, data engineering, and project leadership. Built solutions including a credit risk model (77.2% AUC) and automated data pipelines processing 466,285+ records, while mentoring Batch 2025 cohorts and leading cross-functional initiatives. Skilled in Python, SQL, and end-to-end data workflows from processing to deployment.

Education

PRESIDENT UNIVERSITY

Information System (Data Science) - GPA

Aug 2024 - 2027

Focused on data analytics, machine learning, and information systems development, with hands-on experience in Python, SQL, and data visualization for data-driven decision making.

WORK EXPERIENCE

PUDC (President University Developer Club)

Mentor of Data Science

May 2026 - Now

- Delivered structured mentoring sessions on core data science topics, including data preprocessing, exploratory data analysis (EDA), and machine learning fundamentals, to Batch 2025 junior students.
- Guided mentees through hands-on projects using Python, helping them build end-to-end workflows from data cleaning to model evaluation.
- Provided feedback on assignments and projects, strengthening participants' problem-solving skills and understanding of real-world data science applications.

ID/X PARTNERS Data Engineer Project

Based Internship

Dec 2025 - Jan 2026

- Developing and optimizing robust data pipelines to ensure seamless data availability for large-scale analytical workflows.
- Collaborating on the design of scalable data architectures and maintaining data warehouse integrity to support organizational data processing.
- Implementing automated ETL processes and data cleaning routines to improve the reliability and efficiency of production-grade datasets.

HOME CREDIT INDONESIA

Data Scientist Project Based Internship

Oct – Nov 2025

- Integrated 8 production datasets into numerical features for 307,511 loan applications to support intelligent risk assessment.
- Developed a CatBoost and LGBM model achieving a top-tier AUC of 0.772 to accurately predict customer default probabilities.
- Identified key risk drivers such as income levels and payment delays to strengthen corporate credit decision accuracy.

ID/X PARTNERS

Data Scientist Project Based Internship

Sept - Oct 2025

- Engineered a credit risk prediction model using 466,285 historical records to optimize automated loan approval processes.
- Implemented SMOTE techniques to address target class imbalance, ensuring fair and unbiased predictions across all risk categories.
- Leveraged a Random Forest algorithm to achieve a consistent ROC-AUC of 0.734 for reliable risk classification.

ACTIVITIES

PUMA (President University Major Association) INFORMATION SYSTEMS

Oct 2024 - Sept 2025

Research and Development Division

Golden Code Hackathon

As PIC of Event Organizer for Golden Code: Hackathon 2025, an international competition in collaboration with UNITAR Malaysia, I coordinated the event's technical requirements, scheduling, and logistics for 25+ participants. I managed communication with international stakeholders to ensure smooth cross-border collaboration and oversaw the entire event flow from registration to judging sessions.

Temu Alumni 2025

As PIC of Sponsorship for Temu Alumni, I negotiated with external partners and successfully secured Rp2,000,000 in funding to cover event expenses. I managed sponsor relations and ensured all promotional benefits were delivered, while coordinating with the organizing team to align sponsorship activities with the networking program.

ACADEMIC PROJECTS

AQUANOMIC : Social Project President University x Brawijaya University

Project Manager

May – July 2025

As Project Manager, I led a social initiative to empower over 40 fishermen through digital education, focusing on the development of an educational WordPress prototype. I applied the Scrum Agile framework to coordinate tasks and sprints, ensuring the successful delivery of a workshop in partnership with Brawijaya University. I facilitated hands-on training sessions where participants directly used the website, significantly improving their understanding of digital marketing and online platforms.

AREA OF EXPERTISE

Predictive Modelling
Machine Learning

Database Architecture
Data Pipelines

Event Coordination
Project Planning

ADDITIONAL INFORMATION

- Languages: English, Indonesia (Native)
- Certifications: Data Scientist (ID/X Partners, 2025); Data Scientist (Home Credit, 2025); Data Governance (Rakamin Academy, 2025); Data Analyst Bootcamp (Hari Senin, 2026 Completion)
- Scholarship: Jababeka Scholarship Awardee
- Technical Skills: Scikit-Learn, Numpy, Pandas, Python, SQL, Tensorflow, Looker, Flask API, Flutter, PostgreSQL, Django, Streamlit, XGBoost, LGBM
